Eco House

Energy efficient home

Swiss village residence is designed in the style of European energy-efficient minimalism.

Laconic forms, terraces on different levels, panoramic windows, beautiful views of nature at each house, a unified architectural concept of houses and fences, integrated solar panels - all this creates a special atmosphere of comfort and style.

Swiss village eco-residence architecture and concept

Comfortable accommodation for your family

Comfort and style

Clean lines, split level, panoramic windows affording beautiful views of the natural surroundings, a single architectural concept for all the houses, integrated solar panels, all create a wonderful atmosphere of comfort and style.

Swiss village residence infrastructure

Fitness club with a pool, sports facilities and playgrounds, kindergarten, shops, greenhouses with a farmers' market, medical practice, pharmacy, convenient site access, pedestrian sidewalks, recreation areas and landscaped lake.

Safety and video surveillance

The entire Swiss Village development is under round-the-clock protection with video surveillance, providing a high level of security.

Everything for children

We have put a lot of thought into the **Swiss village**, to make it family friendly, providing playgrounds and walking areas with easy access to the surrounding nature. There will be children's sports groups at the fitness club.

European eco-residence Swiss village

Location in an ecologically clean area

Swiss village is the first project of its kind in Moldova: European style eco-homes with energy efficient houses and a high level of comfort. Situated in the middle of nature, the estate layout and architectural design are blended with energy security and environmental credentials. The residence offers land plots for sale which are 4-6 hundred m².

400 m² 500 m² 600 m²

The **Swiss village** European eco-residences are located in the hills in the north of Chisinau. The development is in the Ciocana district and is part of the Tohatin commune. It will take you just a few minutes by car to reach main areas of the city.

It's easy to own your own eco-residence in **Swiss village**

Profile of a typical KRS house | XL | L | M

The price of the house includes the construction work and materials

Houses in the KRS range are built using high quality materials, using modern building methods that are rapid, with nothing like them elsewhere in Moldova.

Seismic resistance - up to 9 on the Richter scale.

- In the first stage, all reinforced concrete elements are produced at the factory, along with load-bearing glass, damp proofing insulation tape, building blocks, columns, ceilings, etc.
- At the second stage, all the necessary elements are delivered to the construction site.
- At the third stage, assembly is carried out with the installation of the prefabricated elements, turning them into a robust building. External and internal walls are filled with bricks - Brikston.
- Finally, the roof is added and the facade is finalised, along with window and door installation.

External walls

- Brikston Ceramic block 300 mm.
- Parapets and 120 mm. ventilation bricks

PVC windows Veka profile

- Veka PVC profile 5 chambers
- Reinforcing metal 1,2 mm.
- Double-glazed window 32 mm. Low-E
- Aluminum handle
- Siegenia Favorit furniture
- The drain pipes are galvanized

Facade system

- 100 mm. Polystyrene foam
- Decorative plaster Grenart Midi Kale
- Facade covers from galvanized metal

Roof Installation

- Damp course
- Extruded polystyrene 100 mm.
- Sloping layer polystyrene concrete 250-350 mm.
- Cement-sand screed 50 mm.
- Crystal waterproofing
- Sufficient waterproofing in 2 layers
- Aerators

Construction area		122,35 m²
Roof Solar power station		109,90 m ²

Visualization of KRS houses facades

KRS house models have these facade solutions, where the modern trend is towards monochrome colour schemes with light shades. A key feature is the built-in highlighting around the perimeter of the house.

The addition of large windows and glazing provide generous light levels to the rooms, giving a wonderful spacious feeling.

Table of exterior facades' decoration

Financial projection scenarios

UNFAVORABLE CASE

Revenue forecast	\$ 85 842
Cost Estimation	\$ 95 000
ROI	- 9,64 %

Could occur if construction of the **Swiss village** project is halted and being the only house up to sale.

Swiss village | KRS 3 M House

MODERATE CASE

Revenue forecast	\$ 118 050
Cost Estimation	\$ 95 000
ROI	24,26 %

Could occur if the **Swiss village** project develops at a slower pace and real estate sales are made in the early stages of the overall implementation of the project

95,38 m² | 1 Level | 4 Rooms | 1 Bathroom

FAVORABLE CASE

Revenue forecast	\$ 143 070
Cost Estimation	\$ 95 000
ROI	50,60 %

This could happen if the **Swiss village** project develops faster than planned and real estate sales occur in the later stages of the project.
